```python
import random
while(True or False):
    temp=random.randint(10,99)
    hum=random.randint(10,99)

    if(temp>40):
        print("ALARAM ON:  High temprature.....")
    elif(hum>70):
        print("ALARAM ON: HIGH humidity.......")
        break
```
